

# INTEGRAL

THE TONER FOR BETTER IMAGES

Meet the 2nd Generation of  
INTEGRAL colour toner for  
use in  
Kyocera!

**Supreme  
Print Quality**

**High Page Yield**

INTEGRAL has succeeded in developing the colour toner solution that Kyocera Dealers and Distributors have been waiting for...

In the past dealers had a choice between high-priced OEM toner and low-priced, but often low quality aftermarket toner for these printers.

Aftermarket colour toners for Kyocera applications in the past have frequently shown problems like toner dropping, background, high toner consumption, short life of drum units, leading often to misprints adding cost.

INTEGRAL has overcome these obstacles and is offering a solution that provides real cost savings with optimised print quality and page yield performance.

**Discover our range for use in Kyocera, to use as:  
TK 540, TK 550, TK 560, TK 580 and TK 590**
