## MAIN PRODUCT LINE

- **GreenLine – Premium Refurbished Printing Machines**

With **GreenLine Machines** we can offer our partners the opportunity to promote sustainable printing services (MPS) with higher profits.

Green line machines are not only the **“true circular economy solution”** but it also lowers initial hardware investments and print costs while maintaining exceptional quality and full manufacturers guarantee.

***“The most cost efficient and most sustainable printing solution on today's MPS market are Green Line Machines running on R-OEM toners.”***

## • Remanufactured Copier Toners and consumables

**R-OEM toners** – are products where we reuse the original toner bottle and refill it with **100 % genuine recycled OEM toner powder**.

A great and innovative way to **produce sustainable, IP safe and OEM equivalent** products at a very competitive price. All products are manufactured under the strictest **ISO and DIN quality standards** and shipped in a in a brand neutral packaging.

**Remanufactured Toners** – As recycler OEM toner powder is a limited resource, we also offer remanufactured toners where we **use premium aftermarket toner powder**.

The rest of the remanufacturing process and quality control is the same for maximum print quality yield and reliability.

## • Second-Hand Printing Equipment

We also manage a stock and sort more than 15.000 second-hand Printing equipment of different brands in two different quality categories. Eco-Smart and Eco-Select categories are based on lifecycle stage, counters, and machine appearance.

## TRUE WORLDWIDE OUTREACH

Holding **the largest stock of printing equipment in Europe** and our global operations of import export allows us to carry out product movements around the world shipping **approximately 60,000 units and over 280 containers per year**.

We serve clients in **all 27 EU member states** as well as **Africa, Middle East, Asia and Latin America**. Our highly skilled **multilingual sales team** with extensive experience dedicated exclusively to the international market allows us to develop unique and outstanding trade relationships.

All our secondhand **equipment's are sourced exclusively in Europe**. We **only import the best equipment and the most advanced technologies** thanks to **exclusive agreements with the main OEM's** (Original Equipment Manufacturers) and trade partners in Germany, Switzerland Holland, France and the United Kingdom, which guarantees the controlled loading of our printing equipment with the best transport services.

SUSTAINABILITY
